3	3	A - 14/025	The NHS Constitutional targets for admitted care and non admitted care within 18 weeks and the number of elective patients with an incomplete pathway over 18 weeks (Referral to Treatment - RTT) will not be met throughout 15/16. This presents a clinical, financial and performance risk to the CCG.	Monitoring arrangements. The CCG has created a RTT Assurance Group to ensure increased scrutiny of provider actions to mitigate RTT delivery risk. There has also been greater scrutiny of RTT assurance via contract performance meetings from June 2015 and this is reported collectively into the Wiltshire SRG. This includes updates on demand and capacity modelling and risk areas to ensure a proactive, whole system approach to demand management. The RTT assurance group discuss impact on revised national targets and agree next steps to ensure continued assurance of elective waiting times. Additionally individual internal meetings in providers are attended and supported by the CCG as well as relevant tripartite discussions where issues remain. The CCG is linked into the commissioning discussions with Bristol where there is a separate agreed action plan to address 52 week waiters for spinal surgery, and the CSU contacts any non local providers that report a 52 week wait to ensure a To Come In (TCI) date has been agreed.	1) Remedial action plan agreed with GWH - being monitored weekly via dedicated meetings. 2) Remedial action plan to be requested from RUH - in conjunction with BaNES CCG - RUH indicated unachievement of incomplete target for Dec and Jan. Revised trajectory for admitted performance requested via RTT Assurance Meeting. 3) Contractual performance monitoring of demand and capacity across the CCG by speciality to be reported and acted upon via RTT assurance group 4) Independent sector capacity to be more explicitly commissioned to match demand and capacity requirements of population. 5) Acute providers to have sub-contracting arrangements ready to switch on to deal with pressures. 6) Continuation of clinically-led pan-Wiltshire gastro work stream to support demand management 7) Formal review of integrated community dermatology model pilot (west Wiltshire) to support demand management 8) Operational use of OPD escalation framework (jointly with RUH and BaNES) to support demand management and ensure proactive actions in relation to referral management to reduce impact on access for patients	1) ongoing 2) Jan 2016 3) ongoing 4) ongoing 5) closed 6) closed 7) Jan 2016 8) Feb 2016	1) Action plan and trajectory now agreed 2) Via RTT Assurance Meeting and SRG. 7	7	P - 15/024	There is a risk that we do not have whole system operational resilience and capacity over the winter period. The CCG SRG is the Group for providing assurance to the Governing Body (and NHS England) over the preparedness and progress on identified actions, such as high impact interventions and capacity plans over the winter period. The plans model capacity (workforce, beds etc) against predicted demand for the whole system (i.e. all providers - acute, primary care, community and social care). Specific risks have been identified for domiciliary care provision across the period which could adversely affect the flow through the system (i.e. delayed discharges), and staffing ratios for NHS 111 which could adversely affect the impact on the front door with high levels of disposition to ED and 999. GP workforce for the OOH service is also a critical factor.	The SRG meets monthly and reviews all capacity plans and provides assurance on the preparedness for winter. A series of templates are reported through NHSE on 4 recovery plans for RUH and GWH, high impact interventions (including ambulance and mental health), and winter plan assurance (to include additional capacity and plans over the bank holiday periods, flu programme, cold weather plans and communications plan based on the national NHS plans). The CCG are producing a Winter Plan to pull this together to report to SRG, and will report to Governing Body monthly.	The SRG needs sight and assurance of the preparedness for winter and the progress on actions being taken by key providers to mitigate risks. Capacity management plans produced and taken to SRG. SRG next meets 19.11.15 which first draft Winter Plan pulling in the critical staffing rotas from identified high risk areas (H2LAH, 111 and OOH).	19/11/2015	Wiltshire Winter plan complete - draft shared with SRG and agreed via clinical exec Assurance via BaNES and Swindon SRGs on collective winter resilience planning Programme of "home for Christmas" week around RUIH with gold/tactical level calls and actions	4	5	20	new	2 Action Required	18/12/2015	Patrick Mulcahy	Jo Cullen	SRGs
8	8	Q - 15/028	Lack of implementation of agreed joint procedure to determine funding agreement for new s117 patients and the review of existing patients to reflect changes in care needs which may result in the CCG failing to meet its statutory obligations and the incorrect apportionment of costs between the CCG and the Local Authority.
